Towards A Learning Profession

The Teacher Competencies Framework and

The Continuing Professional Development of Teachers

FOREWORD

The Advisory Committee on Teacher Education and Qualifications (ACTEQ) has been working on reforms to improve the professional quality of teachers. This volume, concentrating on continuing professional development, is the first of a series of documents that reflect ACTEQ's recommendations.

ACTEQ shares the common understanding that reforms in education are effective only when they are undertaken by a teaching force with high professional quality. ACTEQ's deliberations fall into three broad categories: initial teacher education, the professional development of beginning teachers and the continuing professional development of practising teachers.

In a nutshell, ACTEQ recommends that teacher education institutions should be constructed as learning communities favourable to developing teachers' capacity for lifelong learning. ACTEQ also recommends an internship system in order to provide new teachers with a comprehensive environment conducive to their development in professionalism. In the realm of continuing professional development, ACTEQ recommends a system that recognises and facilitates teachers' efforts to continuously refresh and upgrade themselves, as is done in most major professions.

All these recommendations will be introduced in separate documents to be published at different stages. ACTEQ has been careful in deliberating the conditions and support with which the recommendations can be most effectively implemented, whilst causing the minimum disturbance to the practice of teachers. The documents will embrace such conditions and support systems.

In this document about teachers' Continuing Professional Development, the recommendations are accompanied by a Teacher Competencies Framework, which is designed to provide a meaningful map of the dimensions and stages of individual teachers' professional development.

Since June 2002, when the current discussions started, ACTEQ has been working with the support and participation, in various ways, of over 200 professionals. What are presented in the documents are the results of very intensive and extensive hard work by many parties to whom we owe our deep gratitude.

Kai-ming Cheng

Chairman, ACTEQ

ACKNOWLEDGEMENTS

The Advisory Committee on Teacher Education and Qualifications (ACTEQ) would like to express sincere gratitude to all the frontline practitioners who have participated in the professional dialogues and exchanges during the course of developing the generic teacher competencies framework and the policy framework for teachers' continuing professional development. They include the academics, teachers and principals who have participated as zealous members of the focus group / task force concerned, representatives of the teacher / education bodies who have generously shared their inspirational thoughts during the informal consultation sessions, as well as the principals and staff of 10 local schools who have enthusiastically participated in the interactive process of the development of the generic teacher competencies framework.

In particular, ACTEQ would like to extend a special vote of thanks to Mr TSOI Heung-sang, Mr CHEUNG Man-biu, Professor LAM Chi-chung, Ms MAK Wai-ching, Dr Magdalena MOK, Dr NG Kwok-hung, Dr WONG Ping-man, Professor HAU Kit-tai, Dr Benny YUNG, Mr Gwyn EDWARDS, Mr IP Kin-yuen, Professor Allan WALKER and Mr Bruce DAVIS for their invaluable contributions to the content of this document.

PREAMBLE

This decade has seen unprecedented reform in school education; much effort and commitment has been directed at improving the quality of education in Hong Kong. Various changes have been introduced by schools, focusing on the needs of our children as they journey into a world requiring knowledge and attitudes very often different from those taught to their parents. Significantly, the pace of change in society has compelled virtually all people, and educators in particular, to give due weight to the need for lifelong learning.

For educators, the rapid changes taking place in contemporary society have meant an end to the sole emphasis on academic achievements. Instead, our schools are concerned to foster the whole person development of students. A new curriculum has been designed - one capable of responding to individual needs and to be tailored by individual school communities. Teaching and learning is no longer confined to classrooms, but extends into the wider community.

The willingness and capacity for lifelong learning, which we expect from our students, should also be reflected in our teachers. Every teacher should be a continuous learner in order to advance the quality of our education system and the quality of students' learning. Continuing professional development of teachers today is crucial to preparing the citizens of tomorrow.

While the need for a new emphasis on teachers' continuing professional development is widely acknowledged, it is less obvious how this can be realised in a meaningful, well-planned and coherent manner. Numbering more than 50 000, Hong Kong teachers require a common reference framework for establishing direction and creating momentum in continuing professional development.

This development work has been undertaken by the Advisory Committee on Teacher Education and Qualifications¹, which has prepared in this document a framework for teachers' continuing professional development. The framework is supported by the parallel development of a generic teacher competencies framework. Together, the two frameworks provide teachers and schools with an essential tool for the advancement of the planning and practice of their professional development.

Practitioners in the education sector are invited to give their views and suggestions about both the generic teacher competencies framework and the policy framework for teachers' continuing professional development. Responses should be sent:

CONTEXT AND DEVELOPMENTS

Context

- 1.1 The need for continuing professional development (CPD) is a deep-rooted conviction in the teaching profession to strive in every way for any improvement...so as to fulfil society expectations of a profession.² Such a theme recurs constantly in all documents related to education reforms.
- 1.2 Through CPD, educators meet the rapidly changing needs of students. Over the years, teachers and principals have participated in a wide range of CPD activities through self-initiated learning and school-based staff development. Since the introduction of the School Management Initiative (SMI) in 1991, SMI schools have been allocating 3 school days per annum for school-based staff development purposes. The practice of arranging 3 staff development days per school year was further extended to all schools in the territory in 1999.

Recent Developments

- 1.3 The first formal systematic arrangements for the professional development of school-based educators were developed in 2002 for principals. For newly appointed principals, *The Principals' CPD Framework* provides a professional development programme for the first two years of service. For serving principals with two or more years of headship experience, the framework provides for a minimum of 150 hours of CPD over a three-year cycle. The timely implementation of the principals' CPD framework has been an unambiguous step forward in the enhancement of professionalism in the teaching force.
- 1.4 As in other places, the work of teachers in Hong Kong is becoming more complex and broader in scope, and teachers' CPD needs have to be researched, recognised and supported if teachers' aspirations towards fuller professionalism are to be realised. One of the viable means is to have a descriptive framework of teacher competencies that embraces the abilities, skills, knowledge and attitudes expected of teachers in different work areas at various stages of their professional growth. For this reason, the Advisory Committee on Teacher Education and Qualifications (ACTEQ) set about producing a framework of teacher competencies within which models of teachers' CPD might be planned. In February 2002, the Focus Group on Teacher Competencies and In-service Professional Development (the Focus Group) was established and tasked with developing a generic teacher competencies framework (TCF) for the reference of both teachers and schools. The TCF thus developed

² Section 2.1.1 of the Code for the Education Profession of Hong Kong (1990).

was endorsed by ACTEQ in March 2003.

- 1.5 In the same month, a Task Force on Teachers' Continuing Professional Development (the Task Force) was set up under ACTEQ to study how teachers' CPD might suitably be promoted.³
- 1.6 In order to have a good grasp of the current situation, the Task Force first set about conducting a survey of teachers' CPD, to which around 1 100 teachers responded. The reference period was the 2001 / 02 school year. The major findings revealed that, in addition to participating in the 3 school staff development days (as noted in paragraph 1.2 above):
 - (a) 82% of the respondents had also pursued other kinds of CPD activities;
 - (b) 30% of the respondents were studying degree or Postgraduate Certificate / Diploma in Education courses in various institutions and 11% were studying the professional upgrading courses at the Hong Kong Institute of Education;
 - (c) apart from those studying the programmes mentioned in (b) above, another 20% indicated that they had spent 30 hours or more on other CPD activities;
 - (d) counting (b) and (c) together with the time spent on the school staff development days, 60% of the respondents had engaged in CPD activities of about 50 hours or more in one school year; and
 - (e) both the manner and content of CPD activities were quite diverse, including structured courses, workshops, visits (both local and overseas), mentoring and sharing effective practices with colleagues and other educators.
- 1.7 Between mid-April and mid-May 2003, the Task Force conducted a series of informal consultations to gauge practitioners' views about teachers' CPD and the recently developed generic TCF. A total of seven professional teaching organisations provided feedback, assisting the Task Force with positive comments and thoughtful opinions on the generic TCF and how teachers' CPD might move forward. In preparing its recommendations, the Task Force also researched the CPD policies and practices of other parts of the world⁴ and noted that systemic CPD policies help to advance teachers' professionalism.

³ See <u>Appendix B</u> for membership of the Focus Group on Teacher Competencies and In-service Professional Development and the Task Force on Teachers' Continuing Professional Development.

⁴ See <u>Appendix C</u> for an overview of teachers' CPD policies and practices in selected regions.

1.8 The next chapter describes the generic TCF and explains the professional values on which it is based. Chapter 3 presents the CPD framework for teachers as recommended by the Task Force.

A GENERIC TEACHER COMPETENCIES FRAMEWORK

Purpose

- 2.1 The professional development needs of teachers vary from person to person and from school to school. A generic TCF should therefore enable individual teachers to make meaningful self-evaluations of their learning needs over a wide spectrum of professional experience. It must enable schools to address the professional development of their entire staff in a manner consistent with established theory and effective practice.
- 2.2 A properly charted TCF greatly assists in the maintenance of an expert professional teaching force. It serves to illustrate what teacher competencies should broadly embrace during the different stages of the teachers' professional growth and development. It provides a template that schools can use for developing school-based professional development frameworks- one which is appropriate to their own students, background and mission. And for those schools that already have a professional development framework, it provides a useful tool for evaluation and revision.
- 2.3 In drafting the generic TCF, the Focus Group believed that the framework must be sufficiently robust for:
 - teachers, schools, teacher education institutions and other stakeholders to ensure the professional growth of individual teachers throughout their careers;
 - teachers, schools and teacher education institutions to plan professional development for school, organisational and individual purposes;
 - teacher education institutions to plan the provision of professional development programmes that match the professional growth and career needs of teachers;
 - the Government to formulate policies for teachers' continuing education and the associated allocation of resources.

Underpinnings

- 2.4 The TCF is guided by the following principles and beliefs:
 - as professionals, teachers should be well-equipped with subject and pedagogical knowledge, professional skills and supporting attitudes and values;
 - teachers have a responsibility to be professionally up to date and to strive for continuous personal growth and professional excellence through lifelong learning;
 - teachers as professionals also have a responsibility to facilitate the professional growth and development of their colleagues;
 - individual teachers can choose to specialise or excel in particular dimensions of schoolwork as they grow in professional maturity;
 - schools should be developed as professional learning communities, teachers'
 professional development should be regarded as an important force in school
 development;
 - different schools may like to develop distinctive versions of the TCF appropriate to their philosophies and circumstances.
- 2.5 The content of the generic TCF is built on the following underlying principles:
 - informed teaching and professional practices improve students' learning;
 - the all-round development of teachers is as important as the all-round development of students;
 - collaboration and networking are essential in improving teaching effectiveness;
 - schools are prominent contributors to the wider community;
 - education goals are best achieved through participative leadership and a corporate capacity to manage change.

Core Professional Values

- 2.6 If it is to be an effective guide to personal professional growth and development, a TCF must be anchored in professional virtue and self-improvement. Becoming a committed professional is more than just meeting a set of technical criteria and achieving high levels of work-related competence. Good teachers are recognised for their love and care for children, their passion for the "subject knowledge" they teach, their support and encouragement in helping students to achieve their best and, perhaps above all, their wholesome personality.
- 2.7 Indeed, the fundamental beliefs, values and attitudes of teachers have to be affirmed before any deliberation of teacher competencies can be meaningful. Especially important is the right of each student to a meaningful education and the belief that every student is able to learn and achieve. From these convictions flow love and care, a respect for the diverse background of students and commitment to fostering whole person development in every child.
- 2.8 Also, teachers as professionals believe in sharing and teamwork. They believe that it is important for teachers to establish and maintain collaborative relationships with school administrators and colleagues, with students and their parents.
- 2.9 Equally important is the teachers' passion for continuous learning and self-improvement. In this era of knowledge expansion, globalisation, high technology and rapid social transformation, the belief in effective learning as an ongoing process is a fundamental tenet of professionalism in teaching. In this regard, a competencies framework plays an important part in providing teachers with reference descriptors that assist them in identifying their own strengths and developmental needs.
- 2.10 Finally, a teacher is valued as a person, whose physical and spiritual well-being is crucial to the teaching profession. The whole person development of teachers is an indispensable part of their professional growth and development. Because of the demanding nature of teaching, teachers who manage their own lives well put themselves in a sound position to be effective professionals. Learning how to maintain physical well-being, manage time effectively and handle emotions and stress all contribute to the whole person development of teachers. Personal growth and self-management widen horizons, enrich the experience of life and lay a solid foundation for the move towards fuller professionalism.

8

Construction of the Generic TCF

- 2.11 Like a map, the TCF is a traveller's guide to the world of teachers' professional development. It lays out the landscape of professional growth and provides both individual teachers and their schools with a sense of 'where they are' in the journey to fuller professional maturity. However, the "map" does not dictate the routes that the traveller has to undertake.
- 2.12 The TCF presented here is deliberately generic. Schools are encouraged and expected to make their own modifications and build a set of references that identify the way ahead and lead to school improvement through professional development.

The Structure of the TCF - Domains, Dimensions, Strands and Stage Descriptors

Domains and Dimensions

2.13 Professional competencies include the abilities, skills, knowledge and attitudes required to achieve professional goals efficiently. To accommodate a wide range of attributes, the TCF has a multi-dimensional hierarchy of domains, dimensions, strands and stage descriptors. The hierarchy takes into account the complex nature of teachers' work and is structured to facilitate diverse patterns of teachers' professional development. The TCF is built around four core domains:

TEACHING AND LEARNING
STUDENT DEVELOPMENT
SCHOOL DEVELOPMENT
PROFESSIONAL RELATIONSHIPS AND SERVICES

- 2.14 Each of the four domains is extended by four dimensions, each of which highlights an important aspect of teachers' work. In turn, each dimension includes a number of strands.
- 2.15 The four core domains of the generic TCF cover the major responsibilities typical of a classroom teacher. While subject-based class teaching constitutes the bulk of schoolwork, teachers also handle a wide range of responsibilities essential to the whole-person development of students including extra-curricular activities, moral / social / civic education, guidance and counselling. Moreover, teachers work as members of the school community and to contribute to the growth of the whole profession. The domains are designed to take the above into account, and are interconnected and interactive with each other.

⁵ See <u>Appendix D</u> for an overview of the TCF and detailed content of each of the four domains respectively.

Strands and Stages of Professional Maturity

- 2.16 Each dimension has a number of strands with stage descriptors linking typical competencies with particular stages of teachers' professional maturity. To accommodate individual capabilities, the stages of professional maturity are not differentiated by arbitrarily selected years of teaching experience. Rather, the adjectives THRESHOLD, COMPETENT and ACCOMPLISHED are used to locate identifiable stages on a continuum of growing professional achievement. This is represented in the generic TCF competency descriptor chart in a left-to-right sequence. This is not meant to imply a rigid, linear, stage-by-stage progression. Nor is it intended that the right-hand end of the chart represents a finite limit. Rather, the TCF sequence is designed to be open-ended: there will be infinite progression all through their careers as teachers refocus their professional commitment to accommodate the needs of an ever-changing society. In this context, the descriptors provide goals to aim for at particular stages of professional maturity.
- 2.17 At the left-hand end of the generic TCF, under the THRESHOLD column, the stage descriptors outline the basic competencies expected of teachers sufficient for them to be able to perform their daily duties smoothly and independently. Because TEACHING AND LEARNING is the most important focus of any teacher's work, it is acknowledged that the threshold requirements for this domain will be more sophisticated than those for the others (the domain of PROFESSIONAL RELATIONSHIPS AND SERVICES, for example). If it were presented graphically, the THRESHOLD would not be a straight line across the different domains and their dimensions.

Emphasis on the Leadership Track

2.18 One more important point has to be made about the generic TCF chart. 'Expert track' and 'leadership track' are legitimate career emphases for all teachers. By deliberate choice, the statements are slanted towards the leadership qualities required of teachers operating at higher levels of professional competence. In particular, emphasis has been placed on the need for top professionals to be change-agents in moving professional development forward within the education sector. This leadership is NOT to be confused with the executive leadership of school administration. Rather, it is the professional leadership by which a teacher builds up a collegial culture of professional learning and sharing.

Application

- 2.19 The generic TCF is for developmental purposes by both individuals and organisations. It is designed as a reference tool for individual teachers to locate their own stages of professional maturity and plot their own competency profiles. It is also designed to enable schools to look at the collective competency of their staff at both individual and organisational levels.
- 2.20 The TCF provides for the proper planning of all CPD. When considering CPD for individuals or schools, it is important to bear in mind that the purpose of the TCF is the enhancement of teachers' professionalism it is not for standardisation. It would be an abuse of the TCF to use it for high-stake performance assessment. Any use of the stage descriptors as formal checklists to measure teachers' performance out of context can only result in stultifying rigidity and lessen their usefulness for teachers' professional development.
- 2.21 When applying the TCF in CPD planning, a broad perspective should be adopted. It is essential to look at a teacher's professional experience as a whole and not to be overly fussy about individual components. A professional development needs analysis must span as much frontline data as possible (such as lesson-planning documents, design of student assignments, samples of student work, observation in the classroom, student assessment methodologies), and should include the self-evaluation and career aspiration of individual teachers.
- 2.22 While the generic TCF presents an analytical framework of teachers' professional development, it does not follow that all teachers are required to reach the same high level of competency in all domains. For the wider benefit of the education community, it is important to encourage diversity of expertise individual teachers may have their own strengths in specific areas of practice. In this context, the TCF becomes a developmental framework revealing areas in which individual teachers might specialise or excel. A school needs teachers with diverse talents and strengths. By looking at the competency profiles of individual teachers in a collective way, a school could plan its staff development work strategically to meet the school's developmental needs.

TEACHERS' CONTINUING PROFESSIONAL DEVELOPMENT

Policy Framework for Teachers' CPD

- 3.1 The very construction of a TCF gives additional momentum to the development and maintenance of a dedicated, professional teaching force. A TCF presents the important message that there are many options available to teachers when moving on to higher stages of professional maturity. At the heart of this progression is the need for CPD the acknowledgement of its lofty aims and the institutionalisation of its practice by the teaching profession in Hong Kong.
- 3.2 A CPD policy is successfully realised only when all teachers are engaged in effective professional development. To be effective, a professional development policy must impact beyond those who are already enjoying the abundance of learning opportunities.

Guiding Principles

- 3.3 The CPD policy is guided by the following principles:
 - like most other professionals, teachers are responsible for their own professional growth through lifelong learning;
 - teachers have a responsibility to participate in CPD in order to refresh, enrich and broaden their professional knowledge, skills and experience for the benefit of students;
 - teachers work as members of the school community and their CPD contributes to the collective intelligence of the whole school; contributing to colleagues' professional development also enhances a teacher's own professional development;
 - teachers' CPD caters for both personal and school developmental needs; the prioritisation of CPD is a matter of agreement between individual teachers and their schools;
 - teachers' CPD opportunities need to reflect their unique professional and personal interests, as well as the stages of professional development they have reached in their careers.

Implementation of Teachers' CPD

- 3.4 Schools currently set aside three days per year for school-based staff development activities. The themes and topics chosen for the school staff development days are specific and relevant to the developmental needs of both the school and its staff. By this means all teachers participate in a wide range of professional development activities, including workshops and talks by guest speakers, the sharing of learning outcomes among colleagues, school visits and so on. Additionally, individual teachers engage in personal professional development activities, initiated by individuals themselves, senior colleagues or their principals.
- 3.5 With this practice in mind and assessing the needs which lie ahead, ACTEQ proposes that:
 - all teachers, irrespective of their rank and capacity, should engage in CPD activities of not less than 150 hours in a three-year cycle;
 - time spent on the 3 school-organised staff development days will be fully recognised and counted towards the CPD requirement.
- 3.6 The content, mode and timing of activities are the key components of any CPD plan. With regard to content, the generic TCF provides a reference tool for identifying teachers' professional development needs and a context for aligning these needs with those of their schools. At the same time, it is also important that teachers' professional development should contribute to their personal growth and self-advancement. Although it is not feasible to set a fixed ratio for time allotted to professional needs and that allotted to personal development, an appropriate balance must be made between these competing demands. The need for proper dialogue in this matter between teachers and their schools is obvious. The ultimate aim is to serve the educational interests of students their learning and their development as citizens of tomorrow.
- 3.7 To meet the complex demands of today's education reforms, teachers should have access to a variety of professional learning experiences through a balanced selection of activities. As a reference for teachers and schools in formulating their CPD plans, the distribution of time among the various modes of CPD is proposed below:
 - (a) in a three-year cycle, not less than 50 CPD hours should be spent on structured learning (for example, short courses, seminars and conferences, workshops, degree-awarding programmes) and not less than 50 CPD hours on other modes of CPD

(for example, sharing of good or innovative teaching practice within and across schools, sharing of professional readings and ideas in the context of learning / study circles, mentoring, serving in education-related committees, presenting as trainers / facilitators / speakers for professional development programmes); and

- (b) the remaining CPD hours can be freely apportioned between structured / other CPD modes⁶ at individual teachers' own discretion.
- 3.8 Time spent on school-organised staff development days should be appropriately registered according to the mode of professional development experienced. Last but not least, regarding the timing of CPD activities, the three-year cycle provides the flexibility to make adjustments to suit teachers' individual circumstances.

Operational Considerations

- 3.9 The professional needs of teachers vary from person to person and from school to school. It is therefore important for schools to achieve consensus with teachers regarding the content, timing and mode of their CPD. Generally speaking, teachers are expected to share the same vision and direction as the school. Where necessary, they may need to align their professional development needs accordingly. This convergence is important. Teachers work as members of the school community and teamwork among teachers provides synergies which are as important as individuals' CPD needs.
- 3.10 Teachers have a professional responsibility to plan and manage their own CPD. School-based professional development only proceeds well when schools include the individual needs of teachers in the planning, facilitating and monitoring of their CPD. When drafting CPD plans, teachers should work out with their schools an appropriate balance between school and teacher needs. It is desirable for both the school and its teachers to maintain formal records of teachers' CPD. Teachers' CPD records and staff development plans should also be included as an integral part of a school's annual report and annual plan.
- 3.11 As an important supportive measure, the Government will ensure that relevant training programmes are provided to personnel working at different levels of responsibility in schools. As early as possible, principals will be given a comprehensive understanding of the nature and intended purpose of the TCF. The TCF will be included as a major topic in the principal training programmes under *Teacher Professional Growth and Development*, which is one of the six core areas of school leadership. In this connection, a series of programmes will be run in the 2003 / 04 school year for serving and newly appointed principals, with

⁶ See <u>Appendix E</u> for Major Modes of Teachers' CPD Activities.

focus on the generic TCF. The series will include the drafting of school-based strategic staff development plans that would meet the needs of both the school and its teachers. Similar components will be added to the *Preparation for Principalship* course for teachers aspiring to become principals.

- 3.12 Apart from principals' training programmes, workshops and sharing sessions on the generic TCF will also be held for teachers, student teachers, teacher educators and officers of the Education and Manpower Bureau. Furthermore, this document is placed on the web for easy access by the public at large. All these arrangements aim at familiarising the relevant stakeholders with the TCF and the proposed implementation of teachers' CPD, as well as inviting further views.
- 3.13 ACTEQ is fully aware that actualisation of a policy on teachers' CPD can only be meaningfully achieved through the accumulation of practice and experience over time. As such, ACTEQ recommends the provision of a three-year "try-out period". During this try-out period, schools and teachers can experiment with the content, quantity, record-keeping and resources allocation. At the same time, ACTEQ will work closely with the Government in providing schools and teachers with continuous support (including sharing of successful experience), analysing information on and drawing insight from actual field experience. Further recommendations will be made in mid-2007. ACTEQ believes that such a "try-out period" not only helps to promote school-based staff development work but also enables teachers to feel the positive impact brought about by undergoing CPD. Most importantly, the CPD policy is never meant to place an extra burden on the already very busy work of a teacher.

ROLES OF DIFFERENT STAKEHOLDERS IN TEACHERS' CPD

Teachers

- 4.1 Teachers should make a leading contribution to the successful implementation of the CPD framework, for CPD is both a right and an obligation to every practitioner. Teaching requires a constant commitment to self-reflection and the identification of personal developmental needs. By these means teachers gain experience, establish new contacts, explore new knowledge and contribute directly to the development of the school as a learning community. To meet the challenges brought about by the introduction of new curriculum frameworks, new approaches to instruction and assessment, new school-level reform and so on, teachers need to take as broad a view of professional development as possible. Through the existing channels / organisations (for example, the school's Staff Development Committee), teachers can participate and assist in the work of formulating the direction of professional development of the entire staff and setting the criteria for recognising CPD activities. At the individual level, teachers should draft their personal professional development plans in conjunction with the school.
- 4.2 Teachers also have responsibility for promoting professional development within the education sector. They play a crucial role in supporting their colleagues' initial training, induction and continuous learning. They are change-agents of educational reform, exercising an increasingly important professional leadership responsibility.
- 4.3 As a matter of principle in other professions, and as already a practice in Hong Kong, teachers should be prepared to bear the cost, in whole or in part, of engaging in CPD, as an investment in their own professional development and career advancement. Meanwhile, the Government should be responsible for investing in the infrastructure and co-ordination of CPD facilities.

School Leaders

4.4 Schools should include teachers' CPD as an important part of their development, which contributes to curriculum reform and school-based management for the benefit of students. School leaders, including School Management Committees and school principals, have the responsibility for ensuring that all staff have ample opportunities to engage in professional development activities. They should create professional development opportunities that address the aspirations and development of teachers at different career stages.

- 4.5 Principals should support teachers' CPD by ensuring that both the teachers' professional needs and the school's development needs are met. Principals have the responsibility to motivate staff undergoing CPD and to monitor their progress and effectiveness. It is equally important for them to create opportunities for staff to capitalise on the impact CPD has on their work. For example, the school can introduce the practice of requiring teachers to share the learning outcomes with colleagues. Principals should make teachers understand that the CPD of all the staff contributes to the corporate and collective intelligence of the whole school and ultimately to effective student learning.
- 4.6 Finally, school leaders are uniquely placed to engage external contributors in professional development programmes. School leaders are able to initiate CPD work with other schools, facilitate the participation of their staff in professional learning and encourage the development of networks (say, across school districts or within sponsoring bodies). They have opportunities to explore the resources in the community which can maximise material and other support for their school staff and their professional development.

Teacher Education Institutions

- 4.7 Teacher education institutions should work in close relationship with schools and the Government in supporting teachers' CPD and in promoting the use of the generic TCF. By incorporating their academic scholarship with schools' practical experience, teacher education institutions are in a good position to work in partnership with schools to plan and design school-based and individual CPD programmes. Teacher education institutions enjoy the privilege of acquiring an overview of practices in schools and the benefit of more fundamental research into the learning processes of both students and teachers. Teacher education institutions are also well-placed to offer programmes, both school-based and across schools, in the most innovative and effective modes. They are encouraged to serve the development needs of individual teachers, schools and the profession as a whole.
- 4.8 Additionally, teacher education institutions can provide their own professional assistance to the Government. They are well placed to audit the quality of professional development, monitor its effectiveness in the classroom and recommend the directions that CPD might move in the future.

The Government

- 4.9 The Government should take the initiative in promoting professional sharing and a CPD culture among teachers. It should be firmly committed to developing an environment which encourages the professional development of all teachers. The Government should continue to provide leadership and support by giving direction and creating the momentum necessary to promote teachers' CPD. The Government also has the responsibility for stipulating and enforcing the requirements at critical points of a teacher's career , i.e., entry into the profession and promotion.
- 4.10 The successful implementation of teachers' CPD is dependent on the availability of time and resources, and the responsibility has to be shared among the teachers themselves, the schools and the Government. ACTEQ recommends that the Government should continue to invest in teacher development, sponsor policy-initiated training, commission new teacher training programmes in order to meet prevailing needs and, where necessary, provide relief for teachers on full-time training. At present, the annual expenditure on teacher education and professional development amounts to \$70m. In view of the current fiscal constraints, the Government should review the existing deployment of funds and its effectiveness in order to ensure that scarce resources are used in the most effective and equitable manner in the promotion of CPD among all teachers. The Government should also be committed to providing schools with more flexibility in using public funds under their control.

THE WAY FORWARD

- 5.1 Opinions on many aspects of educational reform vary widely within the education sector. However, there is a strong consensus among policymakers, school administrators and teachers that teachers' professional development facilitates the implementation of the curriculum reform and school-based management. It should be given the highest priority.
- 5.2 ACTEQ believes that the successful implementation of teachers' CPD depends very much on the attitudes of the various stakeholders teachers, principals, school management committees, teacher education institutions and the Government. Only whole-hearted support and professional collaboration can ensure the reliability of a generic TCF and the successful implementation of teachers' CPD. Over time, it is expected that both the teaching profession and the Government will share a common wish to nurture the emergence of a self-regulating body within the teaching profession to oversee all matters related to teachers' CPD.
- 5.3 At the close of this document, it is worth reiterating that the quality of continuing education is more important than the quantity. It is not merely the frequency of attendance and participation rates that counts. Rather, it is the kind of professional development activities that can leave a mark on the teachers' perspectives and practice at their different stages of development. Indeed, what should be most cherished is the positive impact of teachers' professional learning on the development of students, the school and the teachers themselves, and this is certainly the outcome of the joint efforts of the Government and the education sector.

Feedback and Sharing of Experience

5.4 ACTEQ welcomes comments on this document. It also looks forward to collecting more examples of CPD practice between now and mid-2007 for sharing within the profession.

Please forward your comments and accounts of your valuable experience

TEACHERS' CPD POLICIES AND PRACTICES IN SELECTED REGIONS

In different parts of the world, systemic CPD polices have been established to advance teachers' professionalism:

- In **Scotland, A Teaching Profession for the 21st Century** (2001)⁷ introduces a contractual 35 hours per year of CPD for all teachers. The Scottish model of continuing education is an appropriate balance of personal professional development, attendance at nationally accredited courses and school-based learning activities. CPD is a condition of service including every teacher having a commitment to CPD. CPD is regarded as an essential opportunity for staff and should be accessible and applicable to every teacher.
- In **England**, the General Teaching Council has initiated the **Teachers' Professional Learning Framework** (2003)⁸. The framework provides a map of professional development experiences for both teachers and those who support, advise and facilitate teachers' learning and development. The Framework acknowledges that "learning runs through a teaching career. It takes place every day, formally and informally, through a wide range of learning experiences, deepening and revitalising teachers' skills, abilities, values and knowledge."
- Teachers' CPD policies in *mainland China* are referred to as *continued education policies* and they embrace the principle that CPD opportunities are made "available to all teachers, giving priority to backbone teachers, offering training according to needs and emphasising real results." (The Ministry of Education, People's Republic of China, 2001)¹⁰. Specifically, all serving teachers are required to undertake 240 hours of CPD activities in a 5-year cycle.

Scottish Executive (2001). A Teaching Profession for the 21st Century: Agreement reached following recommendations made in McCrone Report

⁸ General Teaching Council for England (2003). The Teachers' Professional Learning Framework

General Teaching Council for England (2003). The Teachers' Professional Learning Framework

The mastery of counselling skills is essential to all teachers in dealing with students, parents and colleagues. In the face of the increasing complexity of student needs and student problems, such as family problems, all teachers need to share the responsibility of providing timely and appropriate counselling service for students. In handling difficult situations in which parents are involved, it is important that teachers know how to counsel parents to avoid causing distress or even confrontation. Last but not least, skills in counselling colleagues are also essential in providing support among peers in the face of the increasingly demanding nature of teaching.

All teachers have a part to play in the provision of pastoral care for students, though they may accord different priorities to the different areas of pastoral care such as student discipline and student guidance, depending on the student needs as well as the teachers' experience. While novice teachers may tend to focus their concern on classroom management and student discipline, it is important for all teachers to appreciate the complementary nature of the different areas of pastoral care, eg, student discipline and guidance work actually share the common goal of fostering the positive development of students.

MAJOR MODES OF TEACHERS' CPD ACTIVITIES

Teachers need access to a variety of professional learning experiences in order to meet the complex demands and rapid developments of contemporary society. A survey of teachers' CPD conducted in March 2003 revealed that the majority of our local teachers did undertake CPD of varied modes. Basing on the survey findings, the major modes of CPD activities are outlined in the following tables. The proposed minimum distribution of time indicated inside the brackets is meant to serve as a reference for teachers and their schools in drawing up their CPD plans. To provide further illustration of how teachers' CPD is actually implemented, two real-life teachers' CPD diaries are included as samples.

A. Structured Learning (not less than 50 CPD hours in a three-year cycle)

ACTIVITY MODE	ELABORATION AND EXAMPLES
LOCAL / OVERSEAS CONFERENCES, SYMPOSIA, WORKSHOPS, COURSES	Any professional conference, seminar, symposium, formal meeting, workshop or short course which addresses educational concerns, policy-driven initiatives as well as issues related to teachers' personal development. Examples: • conferences, briefing sessions, workshops on current education reform or curriculum reform organized by the EMB • seminars, workshops on students' diverse learning needs or classroom management organised by the school or school sponsoring body (SSB) during the school staff development days • courses on mentoring, leadership training or management of emotion and stress, organised by the EMB / tertiary institutions • authorised training courses related to the Language Proficiency Requirement (English / Putonghua)
OFFSHORE STUDY VISITS	 These study visits should be structured to include activities such as seminars, discussion sessions, school visits and so on. Examples: study visits to the mainland overseas study tours organised by teachers' bodies, the school, the SSB, the EMB etc.

APPENDIX E

ACTIVITY MODE	ELABORATION AND EXAMPLES
HIGHER ACADEMIC STUDY	These programmes are offered by accredited tertiary institutions and may extend across years. Examples: • PhD Programmes; Master Programmes; Bachelor Degree Programmes; Certificate / Diploma, Advanced Diploma Programmes etc. offered by accredited local or overseas tertiary institutions

B. Other Modes of CPD (not less than 50 CPD hours in a three-year cycle)

ACTIVITY MODE	ELABORATION AND EXAMPLES
JOB ENRICHMENT ACTIVITY	Sharing of good practices / professional readings and ideas within / outside school for the enhancement of teachers' professionalism and ultimate improvement of students' learning outcomes. Examples: • Engaging in, facilitating or promoting collegial sharing, collaborative teaching, peer class observation among colleagues for the betterment of teaching and student learning • forming learning / study circles among colleagues to share professional readings and ideas • production and (first) delivery of a professional presentation on good / informed practices for sharing among teachers during school staff development days / sharing sessions organised on a district basis • visit to other schools / institutions to have professional exchange and sharing of experience about successful innovation / good practices in teaching etc.

ACTIVIT'	Y MODE	ELABORATION AND EXAMPLES
MENTORING	Being mentor to a beginning teacher or student teacher	Providing systematic guidance and support to a beginning teacher / student teacher in day-to-day work, covering areas such as subject knowledge, professional skills and interpersonal relationships. Also providing pastoral care and spiritual support to help a beginning teacher adapt to the school culture and settle more easily into the teaching profession.
	Being mentored	Novice teacher engaging in continuous learning under the guidance and support of the school-appointed mentor.
	• counsellin	ost- lesson observation conferences g and guidance sessions with novice teachers efflective journals / learning logs on theories and workplace es, etc.
ACTION LEARNING	School-based projects	 Taking charge of / participating in school-based projects for the betterment of teaching and student learning. Examples: school-based quality education fund projects school-based projects related to moral & civic education, reading to learn, project learning and information technology for interactive learning school-based curriculum tailoring projects
	Action study	Research and try-out of educational practices in the classroom, with collection and analysis of data regarding their effects on student learning. The action study should culminate in a written document or report on the findings and implications, for sharing and dissemination among practitioners within the education sector. Examples: • application of information technology in one of the key learning areas • effectiveness of reading to learn in the English / Chinese subjects

APPENDIX E

ACTIVITY MODE	ELABORATION AND EXAMPLES
Publications	Written contributions to scholastic / professional journals sharing knowledge and insights on educational issues / professional practices. Examples: • writing an article, discussion paper, report on a school-based project that contributes to the effective practice of the profession • publication of a book with focus on a specific topic related to teaching and learning • development and production of curriculum / learning materials in specific subject areas
SERVICE TO EDUCATION AND THE COMMUNITY	Rendering service to the wider professional community and participation in education-related committees / working parties outside school helps to widen exposure and broaden perspective, and is therefore beneficial to a teacher's professional development. Examples: • membership of advisory committees / working groups set up under the EMB • serving as trainers / facilitators / speakers for teacher training programmes organised by the EMB / teachers' bodies • membership of professional associations as well as other education-related committees under non-governmental organisations / agencies • participating in education-related community services & voluntary work

C. Sample Teachers' CPD Diaries for the 2002 / 03 School Year

<u>Sample 1</u> Mr Leung is a senior teacher in a secondary school. He is a member of the school's Staff Development Committee. The 3 staff development days organised by his school in the 2002 / 03 school year included a visit, a workshop and professional sharing among colleagues.

Date	Event / Activity	Provider /	Initiated	CPD F	lours
		Organiser	by	Structured	Other
				mode	modes
